

Ansible

The screenshot shows a MobaXterm window titled '3.109.1.109 (ubuntu)'. The terminal displays the output of the command `sudo apt update`. The output shows several errors related to temporary failures in name resolution for various package repositories, including `ap-south-1.ec2.archive.ubuntu.com`, `security.ubuntu.com`, `packages.microsoft.com`, and `ppa.launchpad.net`. The terminal also shows the output of `sudo apt install software-properties-common`, which fails with a similar error. The left sidebar shows a file explorer view of the `/home/ubuntu` directory, and the bottom status bar indicates the system is 'UNREGISTERED VERSION'.

```
ubuntu@ip-172-31-14-240:~$ sudo apt update
sudo: unable to resolve host ip-172-31-14-240: Temporary failure in name resolution

The screenshot shows a MobaXterm window titled '3.109.1.109 (ubuntu)'. The terminal displays the output of the command `sudo apt install software-properties-common`, which is successful. The output shows that the package is already installed and lists several other packages that are no longer required. The terminal also shows the output of `sudo add-apt-repository --yes --update ppa:ansible/ansible`, which is successful. The left sidebar shows a file explorer view of the `/home/ubuntu` directory, and the bottom status bar indicates the system is 'UNREGISTERED VERSION'.

```
